

# Redefining User Operating Systems

## An operating system you can use

With a clean interface and custom software, Nimux provides a clear and useable GNU/Linux experience for regular users. [Learn more about our products.](#)

## Compatible, Secure, Ready.

Nimux combines the specialities of our own software with the sturdiness and stability of open source to create a software experience designed for *you*.

Our team of engineers and developers make sure that every release stands up to compatibility and useability needs to deliver the best experience possible. [Learn about our team.](#)

## Scalable and easy to deploy

Nimux offers custom plans for those who would like to use our operating system on a large scale. [Contact us for a quote.](#)
